Duties include the care of your own patients with supervision and advice available at all times. Attend structured teaching

**Typical working pattern in this placement**

Full shift rota:

9 week rota of 10 hour shifts variable throughout 24 hours.

Teaching; Thursdays: F2 12.30  
A&E 14 00

**Employer information**

The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million.

Our annual income is £199m and employs almost 2,800 staff, making us the second largest employer in Guildford. In particular, there have been a number of recent additional consultant appointments bringing the total number of consultants employed to 160. We have very close links with the University of Surrey and have an extensive education, training and research portfolio.

It is important to note that this description is a typical example of your placement and may be subject to change.

## Individual Placement Description

<b>Trust Site Programme Code</b>	Royal Surrey County Hospital NHS Guildford
<b>Intrepid Post Code Placement</b>	KSS/RA201/666/F2/001  Academic F2 post (4 months Academia/4 months Paeds/4 months Endocrinology)
<b>The department</b>	The Academic Department is based at Royal Surrey County Hospital which serves a population of 3,000,000. The hospital, however, has many tertiary referral units with established patient databases that provide ample opportunity for academia. It also has close links to the University of Surrey, especially the Department of Health Care Management, and also academic general practitioners and psychiatrists
<b>The type of work to expect and learning opportunities</b>	Research is undertaken in a freeform manner to allow trainees to develop and cultivate their own particular interest.  Each trainee is met six months before commencing as an F1 and before they start at the Trust. Trainees are sponsored to attend a research methodology/bioinformatics/statistics course. During the six months of their house jobs they are mentored through developing a research protocol with possible accessory projects. All trainees have an educational supervisor, research supervisor and a clinical supervisor during the academic attachment.

**Where the placement is based** Mainly at the RSCH/University of Surrey. Other arrangements may be made.

**Clinical Supervisor(s) for the placement** Mr Yuen Soon (Consultant Surgeon)  
RSCH  
Professor Simon de Lusignan  
(Professor of Primary Care & Clinical Informatics)  
University of Surrey

**Main duties of the placement** "The aim is to introduce Foundation doctors to academic medicine, in order to encourage individuals to undertake research training and consider a clinical academic career"

The Royal Surrey County Hospital hosts three academic F2s per year. Unlike other units our post are unlinked to research projects and require all trainees to develop their projects in association with the FTPD so as their 4 months in academia is not wasted. In order to succeed all trainees will be contacted midway in their F1 year and offered supervision in developing the project. In order to maximise the training opportunities each trainee will be required to submit a project plan prior to commencing their attachment.

Each research project has different phases,

- Idea-generating phase
- Problem-definition phase
- Procedures-design phase
- Observation phase
- Data-analysis phase
- Interpretation phase
- Communication phase

The ideal objective for the trainee to succeed and have a true experience of research is for the trainee to experience all phases of research. All these phases are unlikely to be completed in a single project in a four month period. It is therefore important for each trainee to identify learning opportunities for each of these phases below within their foundation training. Thus the advantage of the unlinked academic foundation post is vast and also allows each trainee to tailor their academic period. Therefore it is beholden on each trainee to complete their academic training with

supervision.

Each trainee will have an **educational supervisor** for the whole year (Mr Yuen Soon, Prof David Russell Jones, Dr Charles Godden) and a **research supervisor** who will be identified in their F1 year who will be responsible for direct research supervision. Each F2 will also have a **clinical supervisor** who is responsible for their clinical supervision during their academic four months.

Each trainee will be allowed to select a speciality to be attached to during their academic four months. During the four months each trainee will be supernumerary to the service requirements of the firm but will be required to contribute to two clinical sessions of the firm. These firms are to address clinical skills to develop same educational competencies as F2 in non academic posts. These firms will be at the Royal Surrey. There will be no exceptions.

All research projects will be developed in conjunction with research supervisors. Research plans, methodology and protocols should be in place prior to commencing the academic four months. All efforts to facilitate this will be given by the educational centre. Research outside the trust will only be agreed if discussed with educational supervisors and FTPD. All steps must be taken to ensure sufficient mentoring by research supervisors if research is to be undertaken outside the trust.

During the year all trainees will be expected to attend a research methodology and statistic course. This will be budgeted out of the education centre.

It is hoped that each trainee will contribute sufficiently to each project so as to be included in each paper but also to have themselves written and submitted at least a poster to a national meeting.

At the end of the attachment each trainee will be expected to write a reflective practice of their four months of academia addressing all the phases of research as detailed above.

All academic F2 will be expected to complete the same competencies as non academic F2 to achieve F2 competencies to be signed of. There will be no exceptions.

In Summary each Trainee will need to:-

- 6 Mini CEX
- 6 CDB
- 3 DOPS
- Attend F2 teaching at RSCH (70%)
- Reflective practice on all research phases
- Present at a National Meeting or “Communicate” their research project to foundation Faculty group meeting.
- reflective practice on the 2 ethical Committee Meetings attended
- Attend a statistical and research methodology course.

**Typical working pattern in this placement**

Four months academia, freeform fortnightly academic supervision.

Two supernumerary clinical attachments per week.

Attendance at compulsory Foundation Teaching.

**On call requirements:**

As per Paeds/Medical On Call

**Employer information**

## Individual Placement Description

<b>Trust Site</b>	Royal Surrey County Hospital NHS Guildford
<b>Programme Code Intrepid Post Code</b>	KSS/RA201/011/F2/003
<b>Placement</b>	Community Geriatric Medicine FY2 post
<b>The department</b>	<p>The Geriatric medicine department currently has six full-time consultants with two additional community / interface Geriatricians currently being recruited to. We have a needs related geriatric medicine service with two acute wards and consultant led rehabilitation beds at Milford and Farnham. The department includes the stroke service with an excellent stroke unit and leads on acute thrombolysis for the local area. Two of the consultants run the orthogeriatric service looking after all patients admitted with hip fracture. The department also contributes to the acute general medical on call.</p> <p>Interface geriatrics is being developed locally to prevent frail elderly being admitted to the acute hospital if it is felt that this is not in their best interests. The Geriatricians work closely with the GPs, nursing homes and the community services in order to find other solutions to meet the needs of those in frailty crisis.</p>
<b>The type of work to expect and learning opportunities</b>	<p>The FY2 post will be based in the acute frailty unit, seeing patients with the interface team. This includes a consultant, associate specialist and a staff grade working with the hospital based intermediate care team. They will also spend time in Milford Hospital working with the rapid response team seeing patients urgently to prevent admission where possible.</p> <p>Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co-morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients. This post</p>

will give an excellent experience and understanding of services available both to hospital teams and to community teams for the frail elderly.

Geriatric medicine xray meeting and tutorials take place weekly in addition to a weekly medical journal club for all medical teams. There is also weekly foundation teaching on a Thursday.

**Where the placement is based**

The post is based in the admissions unit at the RSCH and at Milford. The post holder will take part in the Medical on-call rota in the medical assessment unit.

**Main duties of the placement**

Duties include reviewing patients identified by A&E and the acute on call teams who may be managed as out-patients or transferred to community hospitals. A problem list based approach is essential. Close liaison with the next of kin and the multidisciplinary team is required. Rapid response clinics are run at the RSCH and at Milford. Clinics are also planned in local Nursing homes.

**Typical working pattern in this placement**

Monday to Friday 8.30 -5pm with additional out of hours on-calls.

Time for audit activity and tasters to fit in with the team.

*On call requirements:* 1 in 10. All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Shift patterns vary and maybe subject to change to meet service requirements. In general the shifts are: 08:00-20:00; 15:00-23:00, 20:30-09:30 Mon-Sun [with some slightly different start and finish times throughout the week].

<b>Site</b>	Guildford
<b>Programme Code</b>	KSS/RA201/001/F2/004
<b>Intrepid Post Code</b>	
<b>Placement</b>	General Internal Medicine, Diabetes & Endocrinology, FY2 post.
<b>The department</b>	<p>The Department of Diabetes &amp; Endocrinology prides itself in leading clinical innovation and research in the field of diabetes and endocrinology. The department is housed within a purpose-built ambulatory care centre, designed by Nicholas Grimshaw (Eden Project) and includes a four bed research unit.</p> <p>The University Department of Diabetes &amp; Endocrinology, one hundred yards from the Clinical Care Centre, is fully integrated and has state of the art laboratories founded by the Wolfson Foundation. In addition to overseeing all of the diabetes and endocrine outpatients services there is also a general medical and specialist ward area within the main body of the hospital. The Department has a high research income has a very good publication record and is involved in many aspects of innovation in clinical care.</p>
<b>The type of work to expect and learning opportunities</b>	<p>The FY2 will attend a full clinical education programme (which has a high evaluation)The FY2 post is based on one of the general internal medicine wards but also the FY2 will take part in many of the outpatient activities that cover specialist diabetes and endocrinology. There will also be an opportunity to attend the Ante Natal Diabetes Clinic together with paediatric and adolescent transition clinics. Acute medical experience will be gained as part of the on call medical take and all aspects of general medicine will be experienced. There will be opportunities to work with the whole range of the multidisciplinary team both in diabetes and endocrinology and general internal medicine. There are many opportunities for learning and the clinical experience is both wide, varied and involves specialist diabetes and endocrinology in addition to general internal medicine.</p>
<b>Where the placement is based</b>	<p>The post is based on the general medical ward, the medical assessment unit and the diabetes and endocrine specialist centre (The Cedar Centre).</p>

**Clinical Supervisor(s) for the placement**

The clinical supervisors are Professor David Russell-Jones and Dr. Victoria Hordern.

**Main duties of the placement**

The duties of the post involve being part of the acute medical take, looking after all of the general medical patients admitted under the team together with looking after the specialist diabetes and endocrine patients. Ward rounds will involve seeing referrals with seniors in every department within the hospital who have diabetes and endocrine conditions. Specialist diabetes and endocrine clinics will be attended and clinical experience gained. The multidisciplinary team meetings for both diabetes, thyroid cancer, and pituitary tumour (neurosurgery will be attended on a weekly basis). Research meetings within the University Department of Diabetes and Endocrinology will also be attended together with general teaching involving the division of medicines educational half day programme and journal club.

**Typical working pattern in this placement**

A typical working pattern in this post is as follows:  
Monday a.m - Ward Round; MDT; ward work  
Or outreach clinic at community hospital; or One Stop Multidisciplinary Thyroid Clinic.  
Tuesday - Usual on call day; Ward round and ward work; followed by Pituitary MDT video link to London/academic research meeting; Ward work.  
Wednesday - morning post take ward round/ward work; Multidisciplinary Diabetes Team Meeting; General endocrine clinic.  
Thursday - Journal Club; Thyroid cancer MDT; Pituitary Clinic/Specialist Diabetes Renal Clinic/Young Person's Diabetes/Antenatal Clinic.  
Friday - Ward Round; Ward work;

Arrangements are made for the individual to take part in the research activity and audit activities of the department plus specialist clinics can be attended (antenatal, diabetes, paediatric diabetes) on rotation.

**On call requirements:**

On call requirement 1:10.

All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. <b>Placement</b>	ENT Surgery FY2 post
<b>The department</b>	<p>The ENT department currently has four full-time consultants, one part time consultant and a further 4 consultants who have a joint contract between Epsom or Ashford and St Peter's Hospitals with the Royal Surrey (they participate in the on call rota and also do additional clinic and operating sessions at the Royal Surrey). We have 2.5 Specialist Registrars, a trust grade practitioner and a Surgical CT1. We serve the Royal Surrey catchment population for "general ENT" referrals, are the regional Head and Neck cancer unit (for Surrey, West Sussex and Hampshire) and also admit emergency/acute ENT not only for the Royal Surrey and its catchment population but also for Epsom and Ashford and St Peter's Hospitals. The department provides tertiary Head and Neck, Rhinology and Otology (including balance and Audiological medicine) services We have a dedicated ENT/ Head and Neck ward (Clandon) shared with the Maxillofacial unit, a dedicated ENT treatment room and a dedicated ENT clinic. Paediatric patients are managed on Compton and in a dedicated Paediatric clinic (also seen daily in other clinics)</p>
<b>The type of work to expect and learning opportunities</b>	<p>The F2 placement includes the management of ENT inpatients, emergency clinic and first on emergency ENT cover. Formal ENT teaching occurs twice weekly (1x Consultant lead and 1x SpR lead) with a syllabus. In addition,</p>

F2s are expected to go to the Mandatory F2 teaching held on a Thursday in the PGMC. We also actively encourage participation in theatre and “sitting in” with the Consultant in clinic where “informal teaching” occurs. Theatre and clinics are where training assessment tools can be discussed/ filled in.

This post is ideal for anyone wanting a career in General Practice (over a 1/3 of all GP work is ENT based), Paediatrics, Emergency Medicine and Surgery. By the end of 4 months F2s will be competent in the management of outpatient emergency ENT, acute ENT, have a thorough understanding in Head and Neck pathology and its management (alongside working with the MDT), airway problems and Paediatric ENT.

**Where the placement is based**

The FY2 post is based at the Royal Surrey with clinical time split between the ward, emergency cover (A and E and Clandon treatment room), ENT emergency clinic (runs alongside the Consultant ENT clinic.), outpatient clinic and theatre.

**Main duties of the placement**

Duties include the day to day care of patients on the ward, including the complex head and neck patients, running the ENT emergency clinic (after appropriate training) and being involved (first on) on the dedicated ENT on call rota. A regular attendance at all clinics (Otology, Rhinology and Head and Neck) is expected as is participation in theatre (which will be tailored to your needs/ future career plans)

**Typical working pattern in this placement**

Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions etc.

Mon: am: WR SpR/ ward work/ RS clinic/ Em clinic. Pm: PV clinic/ RS theatre.

Tues: am: SpR WR/ ward work/ Em clinic PM: VS theatre.

Wed: am: Cons WR/ Cons teaching/ ward work/ Em clinic/ Paed clinic. Pm LP theatre/ PV theatre.

Thurs: Cons WR/ SpR teaching/ MDT/ H&N clinic. Pm: F2 teaching/ ward work/ additional Consultant teaching (LP)

Fri: am SpR WR/ ward work/ JRJ clinic/  
Em clinic. Pm: JRJ theatre/ RS theatre  
and ward work

Time for audit activity and tasters to fit in  
with the team.

*On call requirements:* 1 in 6. (no cross  
cover). The on call runs for 25 hours  
from 8am to 9am the following day. After  
8pm the on call can be done from home  
providing that you are within 30 minutes  
travel from the hospital. You are  
expected to go home the afternoon prior  
to your on call and have the whole of the  
day and night off post on call. There is  
no shift system. We are EWTD  
compliant. Rotas will be issued a month  
prior to start date. It is the responsibility  
of the post-holder to ensure on-call  
duties are covered and on-calls are  
attended as per the issued rota. On call  
commitments may be subject to change  
to meet service requirements.

## **Employer information**

The Royal Surrey County Hospital is a

## Individual Placement Description

<b>Trust</b>	Royal Surrey County Hospital NHS
<b>Site</b>	Guildford
<b>Programme Code</b>	
<b>Intrepid Post Code</b>	KSS/RA201/800/F2/002 KSS/RA201/800/F2/003 <b>KSS/RA201/800/F2/004</b> KSS/RA201/800/F2/001
<b>Placement</b>	General Practice FY2 Post
<b>The department</b>	FY2 posts in General Practice are based in a variety of practices in the Guildford area. Each post is based full time in a single practice, with an appropriately trained GP in the practice acting as Clinical Supervisor (CS). The CSs are supported by 3 Clinical Educational Supervisors (CES) who also meet weekly with all the FY2s in General Practice for a tutorial. The CESs co-ordinate a meeting for all CSs once in every 4 month block, for support and transfer of information regarding training. The trainees and trainers are given administrative support by Tracey Cookman at the Education centre of the Royal Surrey County Hospital, and support from the GP Deanery via Martin Brunet, one of the Guildford GP Programme Directors.
<b>The type of work to expect and learning opportunities</b>	<p>Trainees will initially sit in with a variety of members of the primary health care team, including GPs, Practice Nurses, District Nurses, Health Visitors etc in order to gain experience and a better understanding of how primary care functions. They will then start their own surgeries, with appropriate supervision for their level of training, ensuring exposure to both acute presentations of illness and chronic disease management. There will be exposure to the challenge of visiting patients at home and consulting on the telephone, with frequent opportunities to debrief with their supervisor. They will be encouraged to develop and reflect on their consultations skills, and be expected to write their own referral letters and deal with the results of tests they have requested, thus developing the wider skills required in Primary Care.</p> <p>They will be expected to attend the weekly CES tutorials, as well as Foundation teaching in the hospital and practice-based meetings and educational events, thus giving regular opportunity</p>

for more formal learning.

**Where the placement is based**

In a variety of approved practices in and around Guildford.

**Clinical Supervisor(s) for the placement**

Is provided by a named Clinical Supervisor who is one of the GPs in the practice.

**Main duties of the placement**

The duties of the post are tailored to suit the individual needs of the trainee and permit adequate patient contact in order to allow fruitful learning, rather than having a vital service requirement that must be filled. Patient contact is as detailed above.

**Typical working pattern in this placement**

This will be dependent on each practice and the needs of the trainee. While the expectation would be for trainees to work for 10 sessions per week, of which 2-3 are related to study (CES tutorials, Foundation teaching and personal study time), many FY2s in GP will mirror the long days worked by their supervisor, and so work for 6-7 longer clinical sessions with a half day to compensate for the longer days (8.30-6.30). Each session will usually consist of a surgery followed by telephone calls and paperwork. Home visits would take place approximately 3 times per week.

**On call requirements:**

None

**Employer information**

This is dependent each GP practice, although the formal employer remains the Royal Surrey County Hospital, Guildford.

The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for Cancer, Oral Maxillo-facial surgery and Pathology. <b>Placement</b>	Breast and Melanoma Surgery FY2 post
<b>The department</b>	The Department comprises of 3 Consultants. 2 Consultants undertake both breast and melanoma surgery, 1 undertakes solely oncoplastic breast surgery.
<b>The type of work to expect and learning opportunities</b>	The FY2 is predominantly clinic and theatre based. The job involves the ward management of the team's inpatients, assisting in theatre and attendance at outpatient clinics. There are ample opportunities to attend theatre and develop surgical skills. Although the Consultants do not participate in the General Surgery rota the FY2s partake in the Surgical on call rota and will undertake an 'acute block' of nights and days on call during their placement. This allows the F2 to further develop their assessment skills by seeing GP and A&E referrals and undertaking initial management. There is ample opportunity to undertake clinical audit within the department.
<b>Where the placement is based</b>	Most in-patients are situated on Elstead ward but the majority of activities are based in theatre and outpatients.
<b>Clinical Supervisor(s) for the placement</b>	Clinical supervisors are Ms Tracey Irvine and Prof. Graham Layer
<b>Main duties of the placement</b>	Duties include supervision of the FY1s, management of the inpatients, assisting in theatre and clinic. There are also outpatient clinics at Haslemere that F2s attend.
<b>Typical working pattern in this placement</b>	There are daily ward rounds commencing at 0800hrs on Elstead Ward.

Mon: Theatre  
Tues: Theatre  
Wed: Outpatient clinics (pm) & MDT  
(12.30)  
Thurs: FY2 Teaching, Theatre  
Fri: Theatre (All day)

**On call requirements:** 1:12 as per General Surgery Rota

**Employer information**

<b>The type of work to expect and learning opportunities</b>	Ward- based management of patients with hepatobiliary disorders including pancreatitis, cholecystitis and obstructive jaundice
<b>Where the placement is based</b>	Frensham ward, RSCH
<b>Clinical Supervisor(s) for the placement</b>	Mr Worthington, Ms Riga, Prof Karanjia, Me Menezes (this may change)
<b>Main duties of the placement</b>	<ul style="list-style-type: none"><li>- Ward Based.</li><li>- Opportunity to assist in theatre if keen to do so.</li><li>- Reviewing unwell patients when asked by nurses + F1s to do so.</li><li>- Organising + presenting the weekly HPB MDT.</li><li>- Ordering investigations and following up results</li><li>- Ample opportunity to gain surgical experience + participate in research/ audits if keen to do so.</li></ul>

**Typical working pattern in this placement** Typical working pattern is this

**Daily:** Ward rounds, ordering investigations, helping the FY1's on the ward as this can be a very busy firm. FY2 is expected to assist in theatre as required and if keen will get plenty of operating experience, very good for those thinking of surgery as a career.

**Mon** – HPB MDT

Presented and organised by either the FY2 or the CT2.

**Thurs:** Weekly, lunchtime Foundation teaching.

On call requirements – nights, evenings and weekend on calls, principally based in SAU/ A+E clerking patients.

FY2 on call is expected to review sick patients on the wards that nurses/ FY1s are concerned about.

On call SHO covers General surgery, Orthopaedics + Urology.

**Employer information**

The Royal Surrey County Hospital is a leading general hospital and a specialist tertiary centre for cancer, Oral Maxillo-facial surgery and Pathology. The hospital serves a population of 320,000 for emergency and general hospital services and is the lead specialist centre for cancer patients in Surrey, West Sussex and Hampshire, serving a population of 1.2 million.

Our annual income is £199m and employs almost 2,800 staff, making us the second largest employer in Guildford. In particular, there have been a number of recent additional consultant appointments bringing the total number of consultants employed to 160. We have very close links with the University of Surrey and have an extensive education, training and research portfolio.

It is important to note that this description is a typical example of your placement and may be subject to change.

## Individual Placement Description

<b>Trust Site</b>	Royal Surrey County Hospital NHS Guildford
<b>Programme Code Intrepid Post Code</b>	KSS/RA201/011/F2/001
<b>Placement</b>	Geriatric Medicine FY2 post
<b>The department</b>	The Geriatric medicine department currently has five full-time consultants. We have a needs related geriatric medicine service with two acute wards and consultant led rehabilitation beds at Milford and Farnham. The department includes the stroke service with an excellent stroke unit and leads on acute thrombolysis for the local area. Two of the consultants run the orthogeriatric service looking after all patients admitted with hip fracture. The department also contributes to the acute general medical on call.
<b>The type of work to expect and learning opportunities</b>	The FY2 post is based on one of the thirty bedded acute geriatric medicine wards receiving complex frail elderly patients from the medical assessment unit. This post is part of a team led by two consultants, an SpR, with a GP trainee and two FY1 doctors. Geriatric medicine is an ideal early post enabling junior doctors to become confident in managing multiple co-morbidities, polypharmacy, chronic disease management, working closely with the whole multidisciplinary team and often relatives or carers in ensuring the best possible outcome for this often vulnerable group of patients.
<b>Where the placement is based</b>	The post is based on Wisley Ward with on-calls in the medical assessment unit. The post-holder covers a weekly geriatric medicine clinic with the GP trainee and attends the departmental xray meeting and tutorials.
<b>Main duties of the placement</b>	Duties include the day to day care of patients on the ward particularly in ensuring a complete history is available including collateral from relatives, carers and the GP. A problem list based approach is essential. Close liaison with

the multidisciplinary team is required with a medical led twice weekly formal MDT meeting for discharge planning. A regular attendance at clinic is expected with opportunities to attend other clinics including TIA / Parkinsons / Syncope available.

### Typical working pattern in this placement

Typical working pattern in this post e.g. ward rounds, clinics, theatre sessions Daily/weekly/monthly (if applicable)

Mon: WR GC / MDT& WR HW or clinic  
Tues: SpR WR and ward work  
Wed: Xray Meeting / Tutorial / wardwork  
Thurs: Journal club / WR GC  
Fri: WR HW and ward work

Time for audit activity and tasters to fit in with the team.

*On call requirements:* 1 in 10. All juniors on banding are expected to take part in the General Medical on-call rota. This rota provides 24/7 cover 365 days per year. Rotas will be issued a month prior to start date. It is the responsibility of the post-holder to ensure on-call duties are covered and on-calls are attended as per the issued rota. Shift patterns vary and maybe subject to change to meet service requirements. In general the shifts are: 08:00-20:00; 15:00-23:00, 20:30-09:30 Mon-Sun [with some slightly different start and finish times throughout the week].

<b>Intrepid Post Code</b>	KSS/RA201/027/F2/001 KSS/RA201/027/F2/002
<b>Placement</b>	Urology F2
<b>The department</b>	The Department of Urology is staffed by 4 Consultants, 1 Associate Specialist, 1 StR, 3 Clinical Fellows, 1 CT1, 2 F2 and 1 F1. It provides a wide spectrum of general urological experience. Specialist interests include prostate cancer, robotic surgery, brachytherapy and andrology.
<b>The type of work to expect and learning opportunities</b>	F2s will get a wide exposure to inpatient and day-case urology. They are also encouraged to attend outpatient clinics. Learning opportunities are ward based, in outpatients and theatres. There is formal weekly teaching for all F2s.
<b>Where the placement is based</b>	The placement is based on Compton Ward at Royal Surrey County Hospital.
<b>Clinical Supervisor(s) for the placement</b>	Mr Raj Nigam, Clinical Director Mr John Davies, Consultant Urologist
<b>Main duties of the placement</b>	The F2 will be an integral part of the Urology team. They will be required to provide assistance to the F1 and help in day-to-day ward duties. They should attend the daily morning ward round with the Registrar and partake in the care of Urology inpatients. As staffing allows they should attend outpatients where possible as there are significant learning opportunities. They may from time to time be asked to assist in theatres. They will be taught how to consent for specific procedures.
<b>Typical working pattern in this placement</b>	Daily ward duties. AKN Clinic—Mon a.m. AKN Theatres—Tue a.m MDT—Tue lunchtimes JHD Theatres—Thu all day JHD Clinic—Fri a.m
	On call duties : As per surgical on call
