

SCRIPT Modules

Module Category	Module title
Principles of Prescribing	Utilising the BNF (C)
	Fundamentals of Pharmacology
	Taking a Safe & Effective Drug History
	Prescription Documentation
	Adherence and Concordance
	Clinical Kinetics
	Dosing and Calculation
	Formulation and Administration
	Prescribing in Infection
Prescribing and Therapeutics in Foundation Training	
Prescribing in Medical Emergencies	Drug Allergy and Anaphylaxis
	Poisoning
	Cardiac Arrest
	Fluids
	Diabetic Emergencies
	Sepsis
Managing the Risks of Prescribing	Toxic Tablets
	Adverse Drug Reactions
	Parenteral Poisons
	Medication Errors
	Monitoring Drug Therapy
	Drug Interactions
	Parenteral Poisons
Prescribing in Special Circumstances	Perioperative Prescribing
	Prescribing in Hepatic Dysfunction
	Prescribing in Renal Dysfunction
	Prescribing in Older Adults
	Prescribing in Pregnancy
	Prescribing in Breastfeeding
	Paediatric Prescribing
	Dementia Friendly Prescribing
Therapeutic Groups	Rheumatology
	Respiratory Medicine
	Diabetes
	Psychiatric Symptom Management in General Hospital Settings
	Anticoagulation
	Infection in Secondary Care
	Management of Pain
	Cardiac Dysrhythmias
	Epilepsy
	Heart Failure
Drugs of Misuse	
Clinical Governance	Rational Drug Choice
	Root Cause Analysis
	Ethics and Consent
	Critical Appraisal Skills
Advanced Prescribing	Palliative and End-of-Life Care
	Managing Complications of Anticancer Therapy
	Prescribing at the Interface and Team Prescribing
